

Clean up the sake warmer dispenser regularly to serve sake at good condition at least once a week.

BODY PART
TSK-130B

Before the maintenance

- Prepare "Cubic Container for cleaning" as per the instruction given on the back.
- Turn the power switch on.

- Close the stopcock.
- Remove the cubic container and make sure to discharge the remaining sake from the appliance.

1. Put the stopcock to a "cubic container for cleaning".

2. Mount the "cubic container for cleaning" on the body and open the stopcock.

3. Pour approx. 5 liters of hot water (under 70°C) into the "cubic container for cleaning".

4. Go to connections
Remove the sever bottle holder and place an empty container under the nozzle.

5. Push the nozzle down and discharge hot water.

※Caution :
HOT WATER!

6. After all hot water comes out, replace the server bottle holder and remove the "cubic container for cleaning".

7. Use the sake server bottle to adjust the holder. (Be sure the nozzle reaches the inside of the server bottle.)

8. Put the stopcock to the cubic container and mount the container on the

Remark: **※**At the first use after cleaning, dispense 50 cc. of sake and use it for cooking because it may contain a dash of water and it won't suit to drink.
※ Close the stopcock when you don't use the sake warmer dispenser.

Finish!!

TAIJI

Clean up the sake warmer regularly to serve sake at good condition at least once a week.

Connections TSK-130B

Remark

- ※At the first use after cleaning, dispense 50 cc. and use it for cooking because sake may contain a small amount of water and it won't suit to drink.
- ※Close the stopcock when you don't use the Sake warmer dispenser.
- ※ Be sure to check the water level indicator before turning on the power switch. Otherwise, the water supply lamp will blink and the warning buzzer will start beeping due to the water shortage.

4-A. Remove the connection and server bottle holder from the body and cubic container.

4-B. Wash the parts inside and outside with warm water.

4-C. Put all parts (except sake level indicator) in hot water and leave them for about 5 minutes.

4-D. Wash the parts with water again and drain the water off. (Wipe inside with cloth).

4-E. Invert all parts and the cubic container back to the appliance.

※Make sure the stopcock is closed.

Finish!!

How to make "cubic container for cleaning"

① Open the cubic container box and take out the empty plastic container.

② Draw a cutting line along the upper edge where is the opposite of the connection point.

③ Cut the container along the cutting line.

Please keep the sake warmer dispenser clean especially summer time.
